

**Response to requirement for Election/Restriction:**

Applicants elect without traverse the invention XLII as defined by the Examiner, that is, the compound or composition of the formula I, where Z=N, X=N, and P is a phenyl group and Q is a 6-membered heterocyclic ring containing only one nitrogen according to claims 1 - 4.

Pursuant to 35 U.S.C. § 121, Applicants elect as a single species the compound of Example 1 of the present application, that is, 3-Amino-6-{4-[3-(dicyclobutylamino)propyl]phenyl}-N-pyridin-3-ylpyrazine-2-carboxamide.

Applicants identify Claims 1 - 4 and 7 as amended and/or presented herein as encompassing the elected species. Applicants further identify claims 15 - 19 presented herein as claims directed to methods of using or methods of making the elected species.

Applicants further identify claims 5 – 6 and 20 presented herein as claims directed to intermediates used in the making of the elected species.
